

Proof of value

Protect your spend with a high-level review to identify key P2P risks.

The problem.

Accounts Payable is growing more complex, with higher transaction volumes and growing compliance standards.

Organisations lack the time and resources to effectively review their transactions and supplier data. This means there is a higher risk of costly payment errors, fraud, and non-compliance, which leaves organisations vulnerable to cash leakage, reputational risk and non-compliance.

Duplicate payments are worth 1% of spend of average. How much could your organisation be losing?.

The solution.

Our experts use FISCAL's AI powered P2P risk management software to complete a rapid independent analysis of your organisational spend, processes, and controls. It's quick and easy to do: You provide the data, and we complete a detailed analysis.

You'll receive:

- An overview of your highest-risk transactions and suppliers, including duplications, errors and supplier dormancy.
- Notifications on incorrect master supplier data.
- Tailored advice on process improvement priorities.

These outputs are designed to set you up for success on your next step of your spend protection journey.

"FISCAL's proof of value report provided instant visibility. I have had concerns over peaks in our transaction volumes for many years. Within minutes, FISCAL's analysis allowed me to highlight area of risks and vulnerability. As a result of this insight, I was able to gain the necessary support to take immediate action."

Finance Manager (NHS)

USERS OF FISCAL SOFTWARE SAVE £258K PER YEAR ON AVERAGE. HOW MUCH COULD OUR REPORT FIND FOR YOU?
