

Value consultancy

Expert support to help you manage risks, recover overspend, and improve processes.

The problem.

Finance teams are under increased pressure to manage more transactions, prevent costly errors, and maintain strong supplier relationships, all while facing limited resources.

As a result, risks such as duplicate payments, fraud, compliance breaches, and missed recovery opportunities often go unnoticed, leading to lost value and inefficiencies.

The solution.

FISCAL offers proactive services designed to help finance teams manage risk, recover value, and optimise processes.

From high-level insights that drive strategic decisions, to ongoing management support, we deliver tangible value back to your organisation.

Each service is supported by forensic data analysis and insights using our P2P risk management software. This ensures that risks are identified, addressed, and mitigated effectively.

"We are very impressed with FISCAL's value consultancy team. In addition to keeping us well informed throughout the entire process, our dedicated consultant ensured that good supplier relationships were maintained and crucially, our bank account was promptly credited with £1.85m"

Simon Cruickshank, Chief Accountant, King's College University London
