

AI connectivity

Integrate FISCAL software seamlessly with your own AI and use our data with your AI workflows.

The problem.

Most P2P platforms ask you to adopt their AI, in their interface, on their terms. But that leaves your processes fragmented, hampering team efficiency. For the team, chasing discrepancies means jumping between systems, and finance leaders struggle to obtain reports.

The solution.

FISCAL's platform features a connector which allows your team use their chosen AI platform to query it. It becomes a connected layer across your systems and workflows, enabling easier access to FISCAL's data. And with underlying content and context, you get trusted, repeatable outcomes, ideal for regular reporting.

It's AI, your way. The AP team have the flexibility to work however suits them best, either within their own AI processes or within the FISCAL software.

Our solution is supported by our experts, who are always happy to answer your questions.

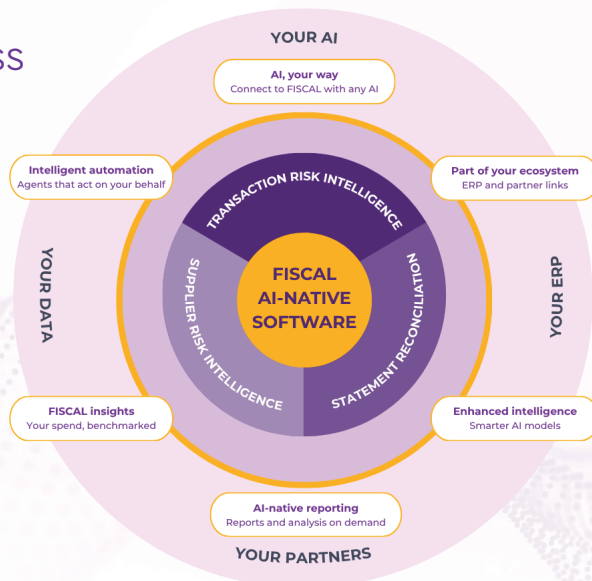

Benefits.

- 1 Access data and reports from your own AI tools.
- 2 Amplify team capabilities to do more in less time.
- 3 Flexibility to use FISCAL with AI workflows.
- 4 Real-time access to your transaction and supplier information.
- 5 Operate within the AI that you already govern.

Features.

- 1 Compatible with AI environments including Copilot, Claude, ChatGPT, Gemini or internal LLMs.
- 2 Connects into ERP systems, Microsoft, and procurement platforms.
- 3 Enterprise-grade security and governance.
- 4 Open architecture built on the MCP standard.
- 5 Access to two decades of specialist P2P data expertise, algorithms and risk intelligence.
